

Ceiling speaker back box

MODEL: AS-301-CBB

Product Overview

The ASES Ceiling Speakers Back Box refers to an enclosure designed to be installed behind a speaker in order to improve sound quality and provide additional protection.

The AS-301-CBB is a Ceiling speaker back box made out of ABS Plastic allowing installation for a wide variety of ceiling speakers. It provides an ideal environment for the installed speakers while reducing the radiation of sound to adjacent rooms. The dimensions of Back Dia 270 mm allow it being placed in between a wide variation of ceiling beams.
