

Carbon Monoxide Gas Detector

Model : AS-611-CO

AS-611-CO is a carbon monoxide gas alarm sensor. When the CO concentration level in the air reaches the presetting alarm level, the sensor goes in alarm mode - an inbuilt sounds will be activated & a LED start glowing.

Features :

1. Portable CO Gas detector
2. Healthy & Alarm
3. Inbuilt LED indication
4. Inbuilt sounder
5. Attractive look

Technical Specification :

Power Source	: 220 V AC/24 V DC
Power Consumption	: 1.7 Watt max
Operation Temperature	: 5°-50°C
Working Humidity	: <95% RH
Alarm O/P	: 90db @ 1 mtr
Product Size	: 135 x 137 x 50 mm (W x H x D)
Detector Casing	: ABS
LED Indicator -	: Detecting : Green LED - Normal Red LED - Alarm
Detecting GAS	: CO
Output	: Potential Free Relay contact

Notice :

1. The product should not be installed in the extreme hot or cold, high wind speed surroundings and in the conditions where there is often a lot of CO Gas & dust.
2. The detector needs to be tested once every month.
3. To ensure its normal performance, please clean the detector surface with soft brush once in every six months. Do cut off the power before cleaning.
4. If the detector is found to be defective, it by yourself. Contact the After Service Center or the distributor for professional servicing.
5. The product can reduce the possibility of accidents, but it can not guarantee absolute safety. Besides using this product correctly, the user is advised to take all necessary precautions for safety and enhance safety consciousness in daily life.
